

# 2007 UNIVERSITY MEDALLISTS

The Dean, Professor Jim Reid, congratulates those students in the Faculty of Science, Engineering & Technology who gained a University Medal in 2007. The University Medal is the highest award given to an undergraduate student. The following three students were admitted to the Dean's Roll of Excellence for each year of their undergraduate degree and, having taken out first class honours, were awarded a Dean's Citation.

## **Steven James AMBROSE**

### **Bachelor of Science and Bachelor of Engineering with Honours**

Steven's honours project involved the design and efficiency testing of a plug-in hybrid electric scooter. He now works as a graduate automation engineer for a major engineering company in Hobart.

## **Stuart Justin COOK**

### **Bachelor of Computing with Honours**

Stuart's honours project used computer models of social networks to improve the efficiency of artificial intelligence systems.

## **Ian William SMITH**

### **Bachelor of Science with Honours**

During his honours project, Ian developed and analysed a mathematical model for understanding the workings of a sophisticated electronic circuit used in radio astronomy.
